Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: As to claim 1, note was made of the reflector being "attached to said base portion" (line 8 from last), the base portion configured to move along "said bottom region" (lines 6-7), and the occluding device "connected to said vertical deflection bar" (line 4 from last), the deflection bar extending to "contact said top region" (line 12). Kirschke's occluding member 41 is connected to the base (and not the vertical deflection bar as called for in Applicant's claim 1), and Kirschke's reflector 40 is connected to the vertical deflection bar (and not the base, as called for in Applicant's claim 1). Claims 2 and 13 are allowable for the same reason as claim 1.
